	Fundamentals of Investment COM-DSE- HC-6036 (A)	<ul style="list-style-type: none"> • To familiarize the students with different investment alternatives, introduce them to the framework of their analysis and valuation and highlight the role of investor protection. • To know the various techniques regarding investment in stock market • To familiarize the students with different investment alternatives, introduce them to the framework of their analysis and valuation and highlight the role of investor protection
	International Business COM-DSE-HC-6036(D)	<ul style="list-style-type: none"> • The objective of the course is to familiarize the students with the concepts, importance and dynamics of international business and India's involvement with global business. The course also seeks to provide theoretical foundations of international business to the extent these are relevant to the global business operations and developments. • To know the various policies regarding international trade. • To learn the principles, methods and process of international trade that play a vital role in economic development.

Department of Computer Application Khagarijan College

PROGRAMME NAME	BACHELOR OF COMPUTER APPLICATION
PROGRAMME AIMS	<ul style="list-style-type: none"> • Students who choose BCA Programme, develop the ability to think critically, logically, analytically and to use and apply current technical concepts and practices in the core development of solutions in the form of Information technology. • Students who choose BCA Programme, develop the ability to think critically, logically, analytically and to use and apply current technical concepts and practices in the core development of solutions in the form of Information technology. • The program covers the various essential concepts in Computer Science. The course lays a structured foundation of Computer fundamentals, Numerical methods, Data structure, Algorithm and Complexity analysis, Software Engineering, Programming Concepts in various languages(C, C++, Java etc.), Computer Networking, System Administration, Operating System, Computer Architecture, Microprocessor, Web technology, Computer Graphics and Database management system etc.
EXPECTED OUTCOME	<ul style="list-style-type: none"> • To communicate technical information both orally and in writing . • Apply the knowledge gained in core courses to a broad range of advanced topics in computer science, to learn and develop sophisticated technical products independently. • To design, implement, and evaluate computer-based system, process, component, or program to meet desired needs by critical understanding, analysis and synthesis.

	<ul style="list-style-type: none"> • Identify applications of Computer Science in other fields in the real world to enhance the career prospects. • Realize the requirement of lifelong learning through continued education and research. • Use the concepts of best practices and standards to develop user interactive and abstract application. • Understand the professional, ethical, legal, security, social issues and responsibilities.
<p>PROGRAMME SPECIFIC OUTCOME</p>	<ul style="list-style-type: none"> • To communicate technical information both orally and in writing • Apply the knowledge gained in core courses to a broad range of advanced topics in computer science, to learn and develop sophisticated technical products independently. • To design, implement, and evaluate computer-based system, process, component, or program to meet desired needs by critical understanding, analysis and synthesis • Identify applications of Computer Science in other fields in the real world to enhance the career prospects • Realize the requirement of lifelong learning through continued education and research. • Use the concepts of best practices and standards to develop user interactive and abstract application • Understand the professional, ethical, legal, security, social issues and responsibilities

Semester	Course Name & No. (HG/Core)	Course Outcome
I	Introduction to Cprogramming (Core) BCA-HC-1016	<ul style="list-style-type: none"> • Learn how to build by the algorithms for problems. • Learn how to create pictorial representations of the program. • Learn data types and control structures of C • Enhance their programming skills • Learn about Loops, Conditional statements, Array, Pointers, File Handling, Structure, Unions etc
	Computer Fundamentals & ICT (Core) BCA-HC-1026	<ul style="list-style-type: none"> • Be able to identify computer hardware and peripheral devices • Be familiar with software applications • Understand file management • To learn about the binary number representation along with its operations
	Computer Based Accounting and Financial Management (Honours Elective) BCA-HG-1016	<ul style="list-style-type: none"> • Acquire conceptual knowledge of basics of accounting • Identify events that need to be recorded in the accounting records • Describe the role of accounting information and its limitations • Develop the skill of recording financial transactions and preparation of reports in accordance with GAAP
	Office Automation (Honours Elective) BCA-HG-1026	<ul style="list-style-type: none"> • Learn basic word processing skills with Microsoft Word, such as text input and formatting, editing, cut, copy and paste, spell check, margin and tab control, keyboard shortcuts, printing, as well as how to include some graphics such as pictures and charts • Skill to work with MS- Word, Excel and PowerPoint • Initiation into the process of writing business letters or job applications, tabulating data, preparing PPTs, etc. using MS-Office
II	MATHEMATICS –I (Core)	<ul style="list-style-type: none"> • Introduce concepts of mathematical logic for analyzing propositions and proving theorems.

BCA-HC-2016	<ul style="list-style-type: none"> • Use sets for solving applied problems, and use the properties of set operations algebraically.
DIGITAL LOGIC FUNDAMENTALS (Core) BCA-HC-2026	<ul style="list-style-type: none"> • Introduce the concept of digital and binary systems • Be able to design and analyze combinational logic circuits. • Be able to design and analyze sequential logic circuits. • Understand the basic software tools for the design and implementation of digital circuits and systems. • Reinforce theory and techniques taught in the classroom through experiments and projects in the laboratory.
Environmental Studies (AECC) ENV-AE-2014	<ul style="list-style-type: none"> • Students will investigate and understand and model the concepts of ecology. • Students will investigate and understand the earth's atmosphere and how it affects living organisms. • Students will investigate and understand soil and human impact on it.
Basic Electronics (Honours Generic) BCA-HG-2016	<ul style="list-style-type: none"> • Basics of electronics understand how devices control electrons via manipulating, storing, switching, selecting, steering, carrying or resisting them. • Knowledge of basic electronics can help you more easily begin your career in electrical engineering.
Introduction To Bio-Informatics (Honours Generic) BCA-HG-2026	<ul style="list-style-type: none"> • To manage data in such a way that it allows easy access to the existing information and to submit new entries as they are produced; • To develop technological tools that help analyze biological data; • To use these tools to analyze the data and interpret the results from a biological perspective.

III	Software Engineering (Core) BCA-HC-3016	<ul style="list-style-type: none"> • As Software development is expensive so proper measures are required so that the resources are used efficiently and effectively. • Cost and time considerations are another factor, which arises the need for Software Engineering. • Reliability factors
	Data Structure And Algorithms (Core) BCA-HC-3026	<ul style="list-style-type: none"> • The structure was established to reflect the relation of data with real-world objects. • Low level of complexity for reusability and robustness
	Database Management System (Core) BCA-HC-3036	<ul style="list-style-type: none"> • Provide for mass storage of relevant data • Making easy access to data for the authorized user. • Providing prompt response to users' requests for data. • Eliminate redundantly (Duplicate) d data.
	WEB TECHNOLOGY (SEC) BCA-SE-3014	<ul style="list-style-type: none"> • The fundamentals of how the Internet and the Web function • A basic understanding of graphic production with a specific stress on creating graphics for the Web • A general grounding introduction to more advanced topics such as programming and scripting.
	PROGRAMMING WITH C# (SEC) BCA-SE-3024	<ul style="list-style-type: none"> • Recognize, diagram, and implement introductory programming concepts using C# • Determine logical alternatives with C# decision structures utilizing iteration, class methods, fields, and properties. • Assemble forms, classes, and controls into C# solutions utilizing arrays and file/database access methods
	OPEN SOURCE SOFTWARE (SEC) BCA-SE-3034	<ul style="list-style-type: none"> • Open source fosters ingenuity; programmers can use pre-existing code to improve the software and even come up with their own innovations. • Open source comes with a built-in community that continuously modifies and improves the source code. • Open source provides great learning opportunities for new programmers.

IV	Computer Organization And Architecture (Core) BCA-HC-4016	<ul style="list-style-type: none"> • To understand how computers are constructed out of a set of functional units. • To understand how these functional units operate, interact and communicate. • To understand the factors and trade-offs that affect computer performance.
	Mathematics-II (Core) BCA-HC-4026	<ul style="list-style-type: none"> • Work with relations and investigate their properties. • Investigate functions as relations and their properties. • Introduce basic concepts of graphs, digraphs and trees.
	Object Oriented Programminf In C++ (Core) BCA-HC-4036	<ul style="list-style-type: none"> • To differentiate between functions, classes and objects. • To learn to overload functions and operators. • To design applications using dynamic memory management techniques.
	Animation (SEC) BCA-SE-4014	<ul style="list-style-type: none"> • Computer Animation and Game Development graduates will have an understanding of critical and aesthetic issues in computer graphics and mixed media. • They will know basic aesthetic principles and concepts, and the production process.
	Mobile Applications (SEC) BCA-SE-4024	<ul style="list-style-type: none"> • Describe the features of the Android phone. • Identify which languages are used in Android development. • Create an Android project using Eclipse. • Explain the role of the Package Explorer.
	Advanced Web Technology (SEC) BCA-SE-4034	<ul style="list-style-type: none"> • On completion of this course, a student will be familiar with client server architecture and able to develop a web application using java technologies. • Students will gain the skills and project-based experience needed for entry into web application and development careers.
	Introduction To Dramatic Arts (Honours Generic) BCA-HG-4016	<ul style="list-style-type: none"> • Build knowledge and appreciation of the dramatic arts, dramatic literature, and performance in their cultural, historical, and interdisciplinary contexts with special

		<p>proficiency in at least one area of theatrical endeavor.</p> <ul style="list-style-type: none"> • Exercise the interdependence of artistic practice and intellectual knowledge. • Understand the dramatic arts as a collaborative art form with social impact.
	<p>Information Security and Cyber Laws BCA-HG-4026</p>	<ul style="list-style-type: none"> • To understand various types of cyber-attacks and cyber-crimes • To learn threats and risks within context of the cyber security. • To have an overview of the cyber laws & concepts of cyber forensics. • To study the defensive techniques against these attacks.
V	<p>Java Programming (Core) BCA-HC-5016</p>	<ul style="list-style-type: none"> • To understand the basic concepts and fundamentals of platform independent object oriented language. • To demonstrate skills in writing programs using exception handling techniques and multithreading. • To understand streams and efficient user interface design techniques.
	<p>Operating System (Core) BCA-HC-5026</p>	<ul style="list-style-type: none"> • To make the computer system convenient to use in an efficient manner. • To hide the details of the hardware resources from the users. • To provide users a convenient interface to use the computer system.
	<p>Project Work / Dissertation BCA-HE-5016</p>	<ul style="list-style-type: none"> • To understand analyse and cater to the current day requirements in the software Industry.
	<p>Data Mining & Warehousing BCA-HE-5026</p>	<ul style="list-style-type: none"> • Study data warehouse principles and its working • Learn Data mining concepts and understand Association Rule Mining • Study Classification Algorithms • Gain knowledge of how data is grouped using clustering techniques.
	<p>Computer Oriented Numerical Methods and statistical Techniques BCA-HE-5036</p>	<ul style="list-style-type: none"> • In computer arithmetic we learn how data is manipulating by using arithmetic operation • Data manipulation is learning to produce result of given problem • Learn about the error occur during arithmetic

	Programming in Python BCA-HE-5046	problems <ul style="list-style-type: none">• Detail study of number representation in memory.• To read and write simple Python programs.• To develop Python programs with conditionals and loops.• To define Python functions and call them.• To use Python data structures -- lists, tuples, dictionaries• To do input/output with files in Python.
--	--------------------------------------	---

Department of Computer Application Khagarijan College

PROGRAMME NAME	POST GRADUATE DIPLOMA IN COMPUTER APPLICATION
PROGRAMME AIMS	<ul style="list-style-type: none"> • PGDCA, which is the abbreviation of Post Graduate Diploma in Computer Application, is a popular course amongst graduates who wish to learn about the nuances of computer hardware and software. Professionals pursue this diploma course as an add-on course as it offers good-paying job profiles. • PGDCA is a sought-after course amongst graduates owing to its shorter period of duration as well as better career opportunities. Computer Applications is the backbone of the IT sector and with an impetus to the Digital India Campaign, many professionals trained in Computer Application are hired across various private and government organizations. .
EXPECTED OUTCOME	<ul style="list-style-type: none"> • Make use of internet for searching and downloading information on web, sending or receive e-mails. • Prepare presentation and perform computation on excel sheet. • Handle windows and Linux operating system for general purpose applications and networking. • Develop general purpose application based on C/C++ and HTML based languages. • Perform various office activities on computer system such as installation of software, handling of printer and scanner, internet connection along with troubleshooting of system.
PROGRAMME SPECIFIC OUTCOME	<ul style="list-style-type: none"> • Students become eligible to pursue MCA and M.Sc. in Information Technology. • They can also join MBA.

Semester	Course Name & No. (HG/Core)	Course Outcome
I	ICT Hardware PGDCAP1	<ul style="list-style-type: none"> • Be able to identify computer hardware and peripheral devices. • Be familiar with software applications. • Understand file management. • To learn about the binary number representation along with its operations.
	Programming in C PGDCAP2	<ul style="list-style-type: none"> • Learn how to build by the algorithms for problems. • Learn how to create pictorial representations of the program. • Learn data types and control structures of C. • Enhance their programming skills. • Learn about Loops, Conditional statements, Array, Pointers, File Handling, Structure, Unions etc.
	Overview of Operating System (DOS, Windows, UNIX / Linux and Shell Programming) PGDCAP3	<ul style="list-style-type: none"> • Understand various terminologies related to Operating system. • Learn the basic structure and organization of the file system. • Acquire knowledge about various process management and CPU scheduling. • Understand various features and application of windows operating system. • Learn about fundamentals of Linux operating system. • Acquire knowledge about various Linux commands.
	Introduction to Office Automation PGDCAP4	<ul style="list-style-type: none"> • Learn basic word processing skills with Microsoft Word, such as text input and formatting, editing, cut, copy and paste, spell check, margin and tab control, keyboard shortcuts, printing, as well as how to include some graphics such as pictures and charts. • Skill to work with MS- Word, Excel and PowerPoint. • Initiation into the process of writing business letters or job applications, tabulating data, preparing PPTs, etc. using MS-Office.

II	Database Management System PGDCAP5	<ul style="list-style-type: none"> • Provide for mass storage of relevant data • Making easy access to data for the authorized user. • Providing prompt response to users' requests for data. • Eliminate redundantly (Duplicate) d data.
	Data Structure and Algorithms PGDCAP6	<ul style="list-style-type: none"> • The structure was established to reflect the relation of data with real-world objects. • Low level of complexity for reusability and robustness.
	Internet and Web Technology PGDCAP7	<ul style="list-style-type: none"> • The fundamentals of how the Internet and the Web function • A basic understanding of graphic production with a specific stress on creating graphics for the Web • A general grounding introduction to more advanced topics such as programming and scripting
	GUI Application Programming PGDCAEL1	<ul style="list-style-type: none"> • Learn basics of Java Swing • Understand the Swing framework • Know the components available for GUI interaction • Understand the basics of handling inputs
	Computer Oriented Numerical Methods PGDCAEL2	<ul style="list-style-type: none"> • In computer arithmetic we learn how data is manipulating by using arithmetic operation • Data manipulation is learning to produce result of given problem • Learn about the error occur during arithmetic problems • Detail study of number representation in memory.
	Computer Graphics PGDCAEL3	<ul style="list-style-type: none"> • To make students understand about fundamentals of Graphics to enable them to design animated scenes for virtual object creations. • To make the student present the content graphically.

	<p>Object Oriented Programming in C++</p> <p>PGDCAEL4</p>	<ul style="list-style-type: none">• To differentiate between functions, classes and objects• To learn to overload functions and operators• To design applications using dynamic memory management techniques

Department Of Economics Khagarijan College

PROGRAMME NAME	B.A. IN ECONOMICS
PROGRAMME AIMS	<ul style="list-style-type: none"> • To provide the students a well-founded education in Economics • To enable the students to make an analytical look at allocation of scarce resources and making the optimum allocation of scarce resources to fulfil wants • To earn the ability to engage in problem solving by using economic theories • To enable students for critical thinking as a part of the analysis of economic problems
EXPECTED OUTCOME	<ul style="list-style-type: none"> • Enhance the entrepreneurship capabilities among the students • Developing skills which cater in solving difficulties in microfinance related matters.
PROGRAMME SPECIFIC OUTCOME	<ul style="list-style-type: none"> • To develop ideas of basic problems of the economy and its solutions • To develop the ability to explain important economic terms, concepts and theories • To apply the economic theories to contemporary social issues and policy formulation • To learn the use of software packages • To enable students to understand various environmental issues and sustainable development • To create employability among the students

Semester	Course Name & No. (HG/Core)	Course Outcome
I	Micro Economics (Core) ECO-HC-1016	<ul style="list-style-type: none"> To know about the subject matter of economics To understand the demand and supply behaviour in market To know the household consumption behaviour To understand about market equilibrium under different market situations To give basic knowledge about the input market
	Mathematical Methods In Economics-I (Core) ECO-HC-1026	<ul style="list-style-type: none"> To understand quantitative techniques in economics To know elementary mathematics To understand application of mathematical techniques in economic theory in general
	Principles of Microeconomics-I (Regular/Generic) ECO-RC/HG-1016	<ul style="list-style-type: none"> To know about the subject matter of economics To understand the demand and supply behaviour in market To know the consumer behaviour pattern of a consumer To know about market structure
II	Introductory Macro Economics (Core) ECO-HC-2016	<ul style="list-style-type: none"> To introduce the basic concepts of Macroeconomics To understand the preliminary concepts associated with determination and measurement of macroeconomic variables
	Mathematical Methods In Economics-Ii (Core) ECO-HC-2026	<ul style="list-style-type: none"> To transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level To understand the basic theories of matrix and its application in economics To know the economic application of optimisation techniques To understand the basic concepts of differential equation and difference equation
	Principles of Microeconomics (Regular/Generic) ECO-RC/HG-2016-II	<ul style="list-style-type: none"> To know how equilibrium can attain with different market structure

		<ul style="list-style-type: none"> To know about factors equilibrium in various market structure
III	Intermediate Micro Economics-I (Core) ECO-HC-3016	<ul style="list-style-type: none"> To know the consumer theory in details To understand the production and cost behaviour in perfect competition market
	Intermediate Macro Economics-I (Core) ECO-HC-3026	<ul style="list-style-type: none"> To understand the determination of national income with the help of aggregated demand and aggregate supply To learn about the impact of inflation and unemployment and its role in the formation of policy To know the open economy model
	Statistical Methods For Economics (Core) ECO-HC-3036	<ul style="list-style-type: none"> To learn the basic concepts and terminology that are fundamental to statistical analysis and inference To understand basic probability theory To learn the techniques of sampling and its uses
	Principles of: Macroeconomics (Regular/Generic) ECO-RC/HG-3016-I	<ul style="list-style-type: none"> To gain a brief idea about Macroeconomics To know about National Income and its related concepts To get an idea about money.
IV	Intermediate Micro Economics-II (Core) ECO-HC-4016	<ul style="list-style-type: none"> To understand general equilibrium and welfare To learn the market structure in details To know the use of game theory in economics To understand the problem of asymmetric information and its solution in economics
	Intermediate Macro Economics-II (Core) ECO-HC-4026	<ul style="list-style-type: none"> To understand the long run dynamic issues like growth and technical progress To know the basic theories of economic growth To evaluate consumption and investment behaviour of households and firms To know the fiscal and monetary policies in an economy To know various macroeconomic thoughts like Classical, Keynesian, New-classical and New-Keynesian
	Introductory Econometrics (Core) ECO-HC-4036	<ul style="list-style-type: none"> To understand basic econometric concepts and techniques To know statistical concepts of hypothesis testing, estimation and diagnostic testing of simple and multiple regression models

		<ul style="list-style-type: none"> To understand the consequences of mis-specification and tests for mis-specification
	Principles of Macroeconomics–II (Regular/Generic) ECO-RC/HG-4016	<ul style="list-style-type: none"> To know about IS-LM model To know about Inflation and its impact and its various types To know about Balance of Payment
	Data Analysis (SEC) ECO-SE-4014	<ul style="list-style-type: none"> The Skill Enhancement Course of Economics gives the knowledge of statistical data handling through various software's like Excel, SPSS and STATA.
V	Indian Economy-I (Core) ECO-HC-5016	<ul style="list-style-type: none"> The syllabus of the course helps student to learn trend of the components of Indian economy during the post-independence period. It also focuses on population and human development. Trends and policies for reduction of inequality are also highlighted in the syllabus.
	Development Economics-I (Core) ECO-HC-5026	<ul style="list-style-type: none"> It provides the concept of development and growth Various growth models are learned by the syllabus. It also helps to know the definition, measures and mechanisms of poverty and inequality.
	Economics of Health and Education (Honours Elective) ECO-HE-5016	<ul style="list-style-type: none"> This paper helps to understand the importance of education and health in achieving the Millennium Development Goals. This course provides knowledge on demand for health and education, government intervention and aspects of inequality. It also gives a picture of health and education in India
	Money and Financial Markets (Honours Elective) ECO-HE-5026	<ul style="list-style-type: none"> It highlights the functioning of monetary and financial sectors of the economy. It helps to know the organization, structure and role of financial markets and institutions. Students come to know the concepts of interest rates, monetary instruments and instruments to control money supply.
	Public Finance (Honour Elective) ECO-HE-5036	<ul style="list-style-type: none"> It highlights various theories of public finance. Students can learn aspects of taxation. Meaning and importance of financial federalism are also learned by the students from this.

	Economic Development Policy in India-I ECO-RE-5016	<ul style="list-style-type: none"> • To know about agriculture revolution and its impact • To Signify the importance of Indian Economy & its various impacts
VI	Indian Economy-II (Core) ECO-HC-6016	<ul style="list-style-type: none"> • It helps to know the impact of macroeconomic policies on the economy. • It helps to learn the performance of Indian agricultural sector. • It also helps to understand the impact of industrial policy and performance of these policies in the economy. • It helps students to understand the trend and performance of Indian service sector.
	Development Economics-II (Core) ECO-HC-6026	<ul style="list-style-type: none"> • It gives the concepts of demography and development. • Students come to know land, labour and capital market from this. • It helps to understand the concepts of environment and sustainability. • It also helps to know the impact of globalisation in Indian economy.
	Environmental Economics (Honours Elective) ECO-HE-6016	<ul style="list-style-type: none"> • Concepts and principles of environment are learned by the students from this course. • The theories of externalities are highlighted by this. • It helps to know various environmental problems and its solutions.
	International Economics (Honours Elective) ECO-HE-6026	<ul style="list-style-type: none"> • The course helps to know the theories of international trade. • Students come to know various trade policies by this course. • The course also helps to know the evolution in the international macroeconomic policy.
	Economic Development Policy in India-II ECO-RE-6016	<ul style="list-style-type: none"> • To know about the various policies about growth and development • To know the contribution of agriculture and industry I Indian Economy

Department Of Education Khagarijan College

PROGRAMME NAME	B.A. IN EDUCATION
PROGRAMME AIMS	<ul style="list-style-type: none"> • It aims to develop a holistic and multidimensional understanding of the topics. • It attempts to approach new areas of learning. • It aims to develop competencies in the students thereby opening various avenues of self-discovery, academic understanding and employment
EXPECTED OUTCOME	<ul style="list-style-type: none"> • Develop a holistic and multidimensional understanding of the topics • Approach new areas of learning. • Develop competencies in the students thereby opening various avenues of self-discovery, academic understanding and employment • Develop an understanding of the issues and participate in the programs and practices in the social context
PROGRAMME SPECIFIC OUTCOME	<ul style="list-style-type: none"> • On successful completion of the course the students become efficient for teaching activities and guiding others to become good citizens in the society by usages of education • Total development of personality of the learners.

Semester	Course Name & No. (HG/Core)	Course Outcome
I	Principles Of Education (Core) EDU-HC-1016	<ul style="list-style-type: none"> • Acquaint the students with sound principles of education Acquaint the students with the important concepts of Education, Curriculum, Democracy, Discipline and Freedom • Develop knowledge about different Aims of Education, various types of Curriculum, Correlation of Studies and Forms of Discipline • Familiarize the students with democratic idea of modern education
	Psychological Foundations of Education & Laboratory Practical (Core) EDU-HC-1026	<ul style="list-style-type: none"> • Understand the relationship between education and psychology • Understand the need of educational psychology in teaching learning process • Understand the nature and theories of learning and role of motivation in learning • Understand the concept of memory, forgetting, attention and interest • Understand the concept of Intelligence, its theories, measurement and concepts of emotional intelligence • Acquaint with different types of personality and the adjustment mechanism
	Foundations of Education (Regular & Generic) EDU-RC/HG-1016	<ul style="list-style-type: none"> • Acquaint with the principles of education • Gain knowledge about different various Forms and Aims of Education • Understand the concept and importance of Discipline and Freedom. • Acquire knowledge about the concept of Emotional and National Integration and International Understanding.
	Philosophical and Sociological Foundations of Education (Core) EDU-HC-2016	<ul style="list-style-type: none"> • Understand the concept of philosophy and its relationship with education • Understand the educational implications of different Indian Schools of philosophy understand the educational implications of different Western schools of philosophy • Know the concept of sociology and its

		<p>relationship with education</p> <ul style="list-style-type: none"> • Develop understanding about the concept of educational sociology, social groups and socialization
II	<p>Development of Education in India-I (Core) EDU-HC-2026</p>	<ul style="list-style-type: none"> • Recount the concept of Ancient Indian education system • Understand the concept of education system in Ancient India, particularly Vedic Education • Understand the concept of the education system in Mediaeval India • Understand the education system during the British period
	<p>Psychology of Adolescents (Regular & Generic) EDU-RC/HG-2016</p>	<ul style="list-style-type: none"> • Enable the students to understand the period of adolescence • Enable the students to understand the significance of the adolescence period in human life • Enable the students to know about various problems associated with this stage • Enable the students to understand the development aspects of adolescence, importance of adolescence period and problems associated with this stage.
III	<p>Development of Education in India-II (Core) EDU-HC-3016</p>	<ul style="list-style-type: none"> • Understand the educational situation during the time of Independence • Understand the recommendations and educational importance of different Education Commission and Committees in post Independence India • Analyze the National policy on Education in different tomes • Accustom with the recent Educational Development in India
	<p>Educational Technology and Teaching Methods (Core) EDU-HC-3026</p>	<ul style="list-style-type: none"> • Understand the objective of educational technology in teaching learning process • Understand the concept and meaning of value • Understand the role of educational institutions in building a value based society • Understand the meaning and concept of peace and its importance in human life • Understand the meaning and importance of

		<p>peace and its relevance at National and international level</p> <ul style="list-style-type: none"> • Identify the different issues/challenges in imparting peace education • Identify the strategies and skills in promoting peace education at institutional level
	<p>Value and Peace Education (Core) EDU-HC-3036</p>	<ul style="list-style-type: none"> • Understand the concept and meaning of value. • Become aware about the role of educational institutions in building a value based society. • Understand the meaning and concept of peace and its importance in human life. • Understand the meaning and importance of peace education and its relevance at national and international level. • Identify the different issues/ challenges in imparting peace education. • Identify the strategies and skills in promoting peace education at institutional level. •
	<p>Guidance and Counselling (Regular & Generic) EDU-RC/HG-3016</p>	<ul style="list-style-type: none"> • Help the students to understand the concept, need and importance of Guidance and Counselling • Enable the students to know the different types and approaches to Guidance and Counselling • Acquaint the students with the organization of guidance service and school guidance clinic • Enable the learners to understand the challenges faced by the teacher as guidance worker.
	<p>Public Speaking Skill (SEC) EDU-SEC- 3014</p>	<ul style="list-style-type: none"> • Students will be able to acquire the capacities of public speaking skill.
IV	<p>Great Educational Thinkers (Core) EDU-HC-4016</p>	<ul style="list-style-type: none"> • Enable the students to learn about relevance of some of their thoughts as present-day context. • Enable the students to learn the philosophy of life of different Educational Thinkers and their works. • Enable the students to learn about the views of thinkers in educational context.
	<p>Educational Statistics & Practices (Core) EDU-HC-4026</p>	<ul style="list-style-type: none"> • Develop the basic concept of Statistics. • Be acquainted with different statistical procedures used in Education. • Develop the ability to represent educational

		<p>data through graphs.</p> <ul style="list-style-type: none"> • Be Familiar the about the Normal • Probability Curve and its applications in Education.
	<p>Emerging Issues In Education (Core) EDU-HC-4036</p>	<ul style="list-style-type: none"> • Acquaint with majoremerging issues-national, state andlocal. • Acquaint with the various issues in education that are emerging in recent years in the higher education system. • Address the various problems and challenges ofeducation in India atall levels
	<p>History of Education in India (Regular & Generic) EDU-RC/HG-4016</p>	<ul style="list-style-type: none"> • Analyse the education system during British Period • Understand the Educational situation during the time of Independence • Explain the recommendations and educational importance of different Education Commission and Committees in post Independent India • Analyse the National Policy on Education in different tomes • Accustom with the recent Educational Development in India.
V	<p>Measurement and Evaluation in Education & Laboratory Practical (Core) EDU-HC-5016</p>	<ul style="list-style-type: none"> • Enable the students tounderstand the concept of measurement and evaluation in education. • Acquaint the students with the general procedure of test construction and characteristics of a good test. • Develop an understanding of different types of educational tests and their uses. <p>Acquaint the studentsabout personality test,and aptitude test.</p>
	<p>Guidance and Counselling (Core) EDU-HC-5026</p>	<ul style="list-style-type: none"> • Help the students to understand the concept, need and importance of Guidance and Counselling. • Enable the students toknow the different types and approachesto Guidance and Counselling. • Acquaint the studentswith the organization of guidance service and school guidanceclinic. • Enable the learners tounderstand the challenges faced by the teacher as guidance worker.
